A Night at the **FAB Lab**

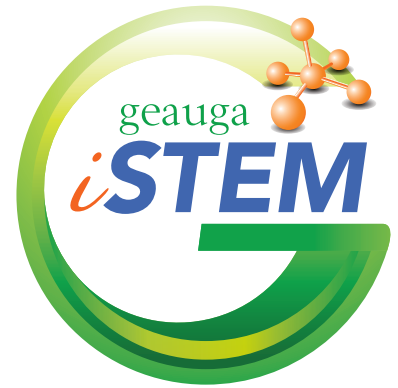

iSTEM Geauga Early College High School
8140 Auburn Road, Concord Township

Want your child
to do something
**UNIQUE &
COOL?**

How about adding
in an evening of
science-filled fun?

When school is OUT,
the
iSTEM
FAB Lab is IN!

Come explore the options, education is in the digital age and technology is no longer a luxury. Technology is a critical learning tool.

You're invited to an evening of fun where students will investigate science careers and can explore how objects are designed and produced. Come and see first-hand how the 3D printers transform virtual designs to real-life models.

All interested students, parents or community members living in northeast Ohio are invited to attend this fun night and explore the state-of-the-art Quest/Fab Lab.

The Quest/Fab Lab will engage students with the ability to electronically design and produce objects such as chairs, lamps, or even a chocolate mold of their face! Students will see first-hand how the 3D printers work, taking the virtual designs and building real-life models. 3D printers are revolutionizing the capabilities and changing the how the world produces things.
