

BUSINESS ADVISORY COMMITTEE

Overview & Expectations

The Purpose of the Business Advisory Committee is to provide linkages and partnerships with local industries and businesses for the **iSTEM Geauga Early College High School** and its students.

SCIENCE | TECHNOLOGY | ENGINEERING | MATHEMATICS

The business advisory committee consists of community leaders that are passionate about **iSTEM Geauga's** mission and vision. Members of the committee must also be willing to serve as strong advocates for the school with their peers and other leaders within the business community.

The committee advises the school on the most effective ways to link students to career paths with local industries. They review key elements of the program to insure that critical hard and soft skills that employers need in their employees are included in the school's curriculum.

The committee may also provide assistance with linking the school's teaching staff to businesses in the area that can propose hands-on projects for the classroom as part of the problem solving approach which is a key element of the core curriculum for the school. The committee will help guide the process to create internships for students in their senior year that will result in capstone projects for those students.

Finally, the committee will help identify key potential donors/supporters for **iSTEM Geauga**. This would include individuals and businesses that would be willing to make financial contributions, provide in-kind support or leverage others to support the school. Committee members will be asked to help make introductions and be part of the cultivation process on behalf of the school with these potential supporters.
